

Intel Corp. (INTC)

We see clear tailwinds in server CPU & upside optionality in foundry, but the stock largely reflects it; initiate at Neutral

INTC

12m Price Target: **\$150.00**Price: **\$131.65**Upside: **13.9%**

We initiate coverage of Intel (INTC) with a Neutral rating and 12-month price target of \$150 (~12% upside). We expect Intel to be a beneficiary of rising server demand (driven by agentic AI), and we see upside optionality from Intel's role as a US champion with its foundry business - with near-term traction in advanced packaging, and longer-term potential in wafer outsourcing. However, Intel's closest peers with better revenue visibility are trading in-line (AMD) or well below (NVDA, AVGO) the stock (on 2030 P/E), which offer more compelling opportunities in our view. **Our view is summarized by the following key points:**

- **We expect a strong ramp in Intel's foundry business, starting with advanced packaging.** In light of positive developments in Intel's foundry business, we expect Intel's advanced packaging revenue to move significantly higher in the near term (to \$10bn by 2030), with external wafer revenue inflecting higher by 2028 (reaching \$11bn by 2030).
- **We expect Intel (along with AMD) to be a beneficiary of growing server CPU demand for agentic AI.** We expect agentic AI to drive significantly higher demand for server CPUs, and believe GPU/CPU attach rates can move from 2X to 1.1-1.4X over time. We expect Intel to be a key beneficiary in enterprise agentic AI due to stickiness of its x86 architecture in the enterprises - but still expect AMD to gain share given a stronger medium-term product roadmap.
- **We believe risk/reward for the stock is relatively balanced at current levels, with peers offering more compelling opportunities.** Our bull/bear analysis suggests a balanced risk/reward with a skew of 1.1:1, and we see peers (Buy-rated NVDA, AVGO and AMD) with better revenue visibility trading in-line or below Intel's multiple on 2030E P/E.

Key points supporting our Neutral rating

Key stock takeaways: We initiate coverage of Intel (INTC) with a Neutral rating and 12-month price target of \$150 (~12% upside). We expect Intel to be a beneficiary of rising server demand (driven by agentic AI), and we see upside optionality from Intel's role as a US champion with its foundry business - with near-term traction in advanced packaging, and longer-term potential in wafer outsourcing. However, with Intel's closest peers with better revenue visibility are trading in-line (AMD) or well below (NVDA, AVGO) the stock (on 2030 P/E), which offer more compelling opportunities in our view.

- **We expect a strong ramp in Intel's foundry business, starting with advanced packaging.** We expect Intel to deliver the most tangible initial progress in its advanced packaging business (EMIB), which we see as a strong alternative to TSMC's CoWoS technology and where we see visibility into a meaningful revenue ramp at key customers starting in 2027. We forecast advanced packaging revenues of ~\$3bn in 2027, ramping to ~\$10bn in 2030. We also have a positive bias on Intel's potential to begin ramping its external wafer revenue as early as 2028 - but believe some technical and operational hurdles remain - and expect potential customer announcements to come over the next 6-12 months. In our base case, we forecast external wafer foundry revenue of \$2.7bn in 2028, with a strong ramp to \$11bn in 2030.
- **We expect Intel (along with AMD) to be a beneficiary of growing server CPU demand for agentic AI.** We expect agentic AI to drive significantly higher demand for server CPUs, and believe GPU/CPU attach rates can move from 2X to 1.1-1.4X over time. We expect Intel to be a key beneficiary in enterprise agentic AI due to stickiness of its x86 architecture in the enterprises - but still expect AMD to gain share given a stronger medium-term product roadmap. Given this structurally higher demand, we model Intel's server CPU revenues to grow at a 28% CAGR through 2030.
- **We believe that risk/reward for the stock is relatively balanced at current levels, with peers offering more compelling opportunities.** We also highlight that peers with relatively better revenue visibility are trading mostly in-line (AMD) or materially below (NVDA and AVGO) Intel's implied 2030 P/E multiple based on our estimates, which we believe suggests more compelling stock opportunities in these other names given greater revenue certainty.

Our Buy ideas in compute: We expect Broadcom (Buy) to maintain its competitive moat in a structurally growing custom ASIC business, and to also be a key beneficiary of AI-related spending through its networking assets. We expect AMD (Buy) to be a key beneficiary of rising CPU demand for agentic AI workloads, augmented by a strong ramp in Datacenter GPU business. We think Nvidia (Buy) will continue to maintain its lead in the broader accelerator market, and we believe the stock presents a compelling opportunity as the stock trades at a discount vs a historical premium to peers.

Key Investment Point #1: Our thoughts on Intel's foundry strategy

Bottom line: We have a cautiously optimistic view on Intel's foundry business, and believe that Intel is beginning to deliver tangible progress on its foundry product roadmap. We expect Intel to deliver the most tangible initial progress in its advanced packaging business (EMIB), which we see as a strong alternative to TSMC's CoWoS technology and where we see visibility into a meaningful revenue ramp at key customers starting in 2027. As a result, within Intel's foundry business, we expect a strong initial ramp in Intel's advanced packaging revenues as the company is already seeing strong demand for its packaging technology. We also have a positive bias on Intel's potential to begin ramping its external wafer revenue as early as 2028 - but believe some technical and operational hurdles remain - and expect potential customer announcements to come over the next 6-12 months. For external wafers, we expect material revenue to begin in 2028, followed by a steep ramp in 2029/30 in our base case. We also present a bull/bear analysis below on the potential outcomes of foundry revenue, and conclude that risk/reward for the stock at these levels is relatively fairly balanced.

Exhibit 1: We forecast Intel's external foundry revenue to reach ~\$15bn by 2030 in our base case

Source: Goldman Sachs Global Investment Research

Advanced packaging business

We believe Intel is seeing strong demand for its EMIB and Foveros packaging solutions driven by several key customers. Management has reported a growing backlog in this business, and has outlined its expectation that packaging revenue will be a precursor to extending key customer relationships to its external wafer business over time. Intel management has struck a more bullish tone on this opportunity in recent quarters (which has been confirmed by our own industry checks), and management expects each customer could potentially represent a “multi-billion” dollar revenue opportunity over time, relative to an earlier estimate of “hundreds of millions.” Overall, we expect packaging revenues to grow from ~\$500mn in 2026 to ~\$10bn by 2030 in our base case,

and we flex these assumptions to both upside and downside in our bull/bear analysis below.

External wafer business

We believe Intel's current external wafer revenues are minimal today, and are not materially contributing to the company's financials. Intel has noted that customer demand signals could be more concrete in 2H26, with additional signals potentially becoming apparent in 2027. The company has also shared that although it has engaged with customers for its Intel 18A-P node, it expects Intel 14A to be the first major external node with sizable revenues, with risk production in 2028 and a material volume ramp in 2029. In our bull/bear analysis, we have flexed potential foundry market share at key potential high-performance compute and mobile customers including Nvidia, Alphabet, Qualcomm, Apple, and others.

Exhibit 2: We forecast 2030 external foundry revenue of \$5bn/\$11bn/\$24.9bn in our three scenarios

2030 External Wafer Revenue Bull/Bear Scenarios			
	Bear	Base	Bull
HPC Customers (\$mn)	\$3,495	\$7,062	\$14,944
Mobile / consumer customers (\$mn)	\$1,574	\$3,942	\$9,977
Total External Wafer revenue	\$5,069	\$11,004	\$24,921

Source: Goldman Sachs Global Investment Research

Exhibit 3: We believe Intel is making its node strategy more predictable, helping to narrow the anticipated launch timing gap relative to TSMC for advanced nodes

Intel								
Process Node	14nm	10nm	Intel 7 (10nm SuperFin)	Intel 4 (previously 7nm)	Intel 3	Intel 18A	Intel 18A-P	Intel 14A
Volume production	2014	2019	2021	2023	2024	2H25/2026	2026/27	2028/29
TSMC								
Process node	16nm	7nm		5nm	3nm	2nm	1.6nm	1.4nm
Volume production	2015	2018		2020	2022	4Q25	2027	2028

Source: Company data, Goldman Sachs Global Investment Research

Foundry bull/bear analysis

Below, we present a bull/bear analysis on Intel's foundry revenues, split between packaging and external wafer revenue. We believe multiple high-performance computing and smartphone customers are currently evaluating both its 18A-P and 14A processes, and would handicap the potential of at least one customer ramping external wafer volume by 2028 as relatively high. However, visibility into the timing and ultimate volume for Intel's external wafer revenue ramp remains limited, and could be somewhat binary based on customer qualification. For these reasons, we believe a bull/bear analysis provides a framework to think about the risk/reward for potential for Intel's foundry business. Our methodology and key assumptions are summarized below:

Our methodology

We view Intel's external wafer customer opportunity coming from two broad categories: (1) HPC/AI customers such as Nvidia, Broadcom, and Google; (2) Mobile/smartphone customers such as Apple and Qualcomm.

In our base case, we assume Intel could achieve ~15% share of Apple and Qualcomm's wafers, 10% share in Nvidia GPUs and Broadcom's ASIC business, with potentially additional business directly from Google for its in-house TPUs (based on recent news article [here](#)).

For wafer pricing, we use our TSMC wafer ASPs for its overseas offerings, and assume a 20% discount on that ASP from Intel to account for potential market execution risk in the near- to medium term.

We acknowledge that these point assumptions are fluid with a wide range of outcomes, and our estimates are based on our understanding of where Intel's foundry revenues could evolve over time in light of recent positive developments for the business.

In our bull/bear analysis, we have flexed potential foundry market share at key potential high-performance compute and mobile customers including Nvidia, Alphabet, Qualcomm, Apple, and others. We have assumed a range of gross margins 25%–55% based on operational scale of the business, with OpEx intensity in the low-double digits based on comparable foundry businesses.

Exhibit 4: Intel Foundry bull/bear analysis - 2030 scenario

2030 Foundry Bull/Bear Scenarios			
Key Inputs			
N1.4 wafer pricing [TSMC]	17,160 overseas (ex China) pricing - GSe		
N1nm wafer pricing [TSMC]	18,876 assuming a 10% hike vs 1.4nm - GSe		
Intel Discount (%)	20%		
	Bear	Base	Bull
Packaging revenue (\$mn)	\$3,000	\$10,092	\$15,000
External wafer revenue	\$5,069	\$11,004	\$24,921
HPC revenue (\$mn)	\$3,495	\$7,062	\$14,944
Consumer/Mobile revenue (\$mn)	\$1,574	\$3,942	\$9,977
Total External Foundry revenue (\$mn)	\$8,069	\$21,096	\$39,921
Gross Margin (%)	25%	46.3%	55%
OpEx (\$mn)	\$1,210	\$3,164	\$5,988
Tax Rate (%)	11%	11%	11%
Foundry Net Income (\$mn)	\$718	\$5,869	\$14,212
Foundry EPS contribution to Intel (\$)	\$0.14	\$1.14	\$2.77

Source: Goldman Sachs Global Investment Research

Key Investment Point #2: We see agentic AI driving strong server CPU growth

Bottom line: We expect Intel to be a beneficiary of rising server CPU demand for agentic AI, and for its PC business to trend in line with muted PC market growth dynamics. We expect the pace of market share loss for Intel in server CPUs to slow in our base case, which is partially dependent on the company re-gaining competitiveness in its process and foundry roadmap. We believe that significant potential upside and/or downside to our estimates are predicated on the success of Intel's process roadmap and foundry capabilities.

Server CPUs

As we have highlighted in our report on agentic AI ([here](#)), we expect the server CPU TAM to grow at an accelerated rate over the next five years, with the x86 architecture benefiting from enterprise AI agents. Quantitatively, we expect agentic AI to drive a

material increase of ~24X in token consumption by 2030. As agentic AI becomes mainstream, we expect the attach rate of CPU:GPU to continue to trend downward, as agents require higher coordination and workflow routing between AI models and enterprise infrastructure – a task which is best suited to CPUs.

Exhibit 5: We expect agentic AI to drive structurally higher growth for server CPUs

Source: Goldman Sachs Global Investment Research

Specifically for Intel, we believe that its success in server CPU market is predicated on success with its internal manufacturing roadmap. In this area, we are cautiously optimistic and recognize that the company's execution over the next 24 months could drive a wide range of outcomes. Overall, we expect the pace of Intel's recent server CPU share loss to slow as Intel ramps products manufactured on its Intel 18A and other advanced nodes – which we expect to be more competitive with AMD's latest server CPUs (based on TSMC's process technology).

Our views on Server CPU competition

We view the competitive dynamics for Intel in the server CPU market from two perspectives: ARM relative to the X86 architecture, and relative to AMD within X86 the ecosystem.

Most important, we expect the proliferation of agentic AI technology to drive a significant shift in the overall structural growth rate in server CPUs relative to recent history. As highlighted in our note ([here](#)), we expect token consumption related to agentic AI workloads to represent 90% of overall tokens by 2030, of which enterprise agentic AI tokens could represent ~50%, and consumer agentic AI tokens could represent 40%.

For ARM vs x86, we expect x86 based servers to retain a majority share in enterprise agentic AI to drive better interoperability between AI agents and existing x86 based legacy infrastructure. For consumer AI agents, we directionally expect a skew toward ARM-based CPUs, especially as it pertains to hyperscaler internal workloads such as Google Search, Amazon's e-commerce business, Instagram, YouTube, etc.

For competition vs AMD — we believe AMD has executed much better on its server CPU roadmap and has continued to gain material share at the expense of Intel — a trend that we expect to continue. As summarized in [Exhibit 8](#), AMD continues to drive higher core

counts on more advanced foundry nodes leading to better performance, although we also highlight Intel’s progress on increasing core count, closing the performance gap vs AMD solutions, and its strong presence in enterprise market. Taking these two factors together, we expect AMD to continue to gain modest share from Intel — albeit at a slower pace vs what we have seen in recent years.

Exhibit 6: We forecast Intel’s server CPU revenue to grow at a 28% CAGR until 2030, driven by proliferation of agentic AI

Source: Goldman Sachs Global Investment Research, Mercury

Exhibit 7: While Intel has continued to lose share to AMD and ARM in server CPU market over the past 5 years, we expect the pace of share loss to decelerate over the next 3 years
Server CPU revenue share

Source: Mercury, Goldman Sachs Global Investment Research

Exhibit 8: AMD continues to execute better from a product roadmap perspective, although Intel is closing the gap vs recent history

	2021	2023	2023	2025	2026E	2027E
AMD						
Product	Milan	Genoa	Bergamo	Turin	Venice	Verano
Node	TSMC 7nm	TSMC 5nm	TSMC 5nm	TSMC 4nm/3nm	TSMC 2nm	TSMC 2nm
Core count	64	96	128	192	256	
Intel						
Product	Sapphire Rapids	Emerald Rapids	Sierra Forest	Granite Rapids	Clearwater Forest	Diamond Rapids
Node	Intel 7	Intel 7	Intel 3	Intel 3	Intel 18A	Intel 18A-P
Core count	60	64	288 e-cores	128	288 e-cores	192

Source: Company data, compiled by Goldman Sachs Global Investment Research

Client Computing group
Exhibit 9: We expect PC units to decline 10% YoY in 2026, followed by modest growth of +2%/+3% in 2027/28

Source: Company data, Goldman Sachs Global Investment Research

At an industry level, we expect muted PC market growth in 2026 as memory shortage related headwinds remain, and are expected to deteriorate further in 2H. Beyond that, we model modest growth of +2%/+3% in 2027/28. More specifically for Intel, we expect relatively stable share going forward in the PC market, and revenue to trend directionally in line with the overall PC industry.

Key Investment Point #3: Intel's normalized earnings power, and our thoughts on the stock

On a headline basis, INTC shares trade at a very high multiple on NTM P/E relative to peers given the company's current minimal scale in its foundry business, as well as recent market share headwinds in its server CPU business. We believe investors are looking past these near-term dynamics, and the current stock price is being driven by a longer-term structural view on Intel's role as a potential US-based manufacturing champion in its foundry business, a market recovery in the server CPU and PC CPU business, and a gross margin recovery based on stronger revenue scale in the medium

term. We believe market expectations for material improvements in the company's foundry business are higher than sell-side consensus - and this is largely priced into the stock at these levels. Given the significant newsflow we expect on Intel's foundry business over the next 6-12 months, accordingly we expect the stock to remain volatile based on uncertainty around specific customer datapoints. At current levels, we believe the risk/reward is balanced with a skew of 1.1:1 based on our estimates, with potential upside/downside coming from external customers (or lack thereof) in Intel Foundry, and higher/lower than expected server CPU revenue driven by the expected proliferation of agentic AI, as well as market share dynamics relative to AMD. For more context, our base case factors in a material improvement in foundry revenues and margins by 2030, and an increasing tile in-sourcing ratio, particularly for datacenter products.

Exhibit 10: Annotated chart of Intel's stock price

Source: FactSet, Goldman Sachs Global Investment Research

Consolidated bull/bear analysis

Although we have presented a standalone foundry bull/bear analysis above ([Exhibit 4](#)), we have also flexed the server CPU revenue opportunity for Intel as the proliferation of agentic AI continues to drive upside to our server CPU industry estimates. Below, we present a consolidated bull/bear analysis for Intel. Our key assumptions are as follows:

- Our foundry bull/bear revenue estimates unchanged relative to the analysis above ([Exhibit 4](#)).
- We assume a 3%/17%/25% server unit CAGR growth from 2026-30 in our bear/base/bull case scenarios respectively, based on varying potential levels of agentic AI adoption.
- We assume incremental / decremental gross margin of 70%, in line with IDM peers.
- We assume OpEx as a percentage of revenue at 21%/20%/19% in our three scenarios respectively, assuming basis operational benefits at greater scale.
- We keep our Client Computing group and Other revenue estimates unchanged in all

three scenarios.

All in, we see a balanced risk/reward with a skew of 1.1:1 for Intel at current levels. We also highlight that peers with relatively better revenue visibility are trading in-line (AMD) or materially below (NVDA and AVGO) Intel's implied 2030 P/E multiple based on our estimates, which we believe suggests more compelling stock opportunities in these other names ([Exhibit 13](#)).

Exhibit 11: Consolidated bull/bear analysis on 2030 estimates

(Note: GS estimates adjusted to exclude ESOs for comparability)

	Bear	Base	Bull
External Foundry (\$mn)	\$8,069	\$21,096	\$39,921
Server CPU (\$mn)	29,843	50,150	64,735
Client Computing Group (\$mn)	36,097	36,097	36,097
All Other (\$mn)	9,402	9,402	9,402

Intel revenue, margin, and earnings overview

Revenue: We forecast a 5-year revenue CAGR (2025-30) of ~17% for Intel, driven by Datacenter and AI (DCAI) business growing at a 27% CAGR, and external foundry business growing at a 172% CAGR ([Exhibit 14](#)). We expect the DCAI segment to represent ~50% of total revenue by 2030, up from 32% in 2025 ([Exhibit 15](#)).

Exhibit 14: We forecast overall revenue to grow at a 17% CAGR over the next 5 years (2025-30), driven by strong ramp in DCAI and external foundry revenue

Source: Company data, Goldman Sachs Global Investment Research

Exhibit 15: We expect DCAI to represent ~50% of overall revenue by 2030, up from 32% in 2025

Source: Company data, Goldman Sachs Global Investment Research

Gross margin: We model gross margin expanding by 1450bps over the forecast period, from 39.2% in 2026 to 54.4% in 2030, driven by a strong ramp in foundry business with improving profitability, and Datacenter business representing an increasing percentage of overall revenue.

Exhibit 16: Non-GAAP gross margin estimates (ex SBC)

Source: Company data, Goldman Sachs Global Investment Research

Operating margin: Driven by strong revenue growth, expanding gross margins and cost control efforts, we model operating margins to expand 2250bps from 12% in 2026 to 35% in 2030.

Exhibit 17: We model operating margins to expand 2250bps from 12% in 2026 to 34% in 2030.

Non-GAAP Operating margin (ex SBC)

Source: Company data, Goldman Sachs Global Investment Research

EPS estimates: We forecast 2026/27/28 non-GAAP EPS (ex. SBC) of \$1.05/\$1.75/\$3.35, respectively.

FCF margin: We forecast 2026/27/28 FCF of \$(6.9)bn/\$9.3bn/\$16.3bn and FCF margins of -12%/13.8%/20.4%, respectively.

GS vs. Consensus

Our 2026/27 estimates are modestly below/above Street respectively, and our 2028 EPS estimate is 44% above Street, driven mainly by upside potential in the Foundry and Datacenter business. We believe the Street does not fully capture the external foundry revenue opportunity that we have included our estimates, or the structural growth opportunity in server CPUs, which we expect to be driven by agentic AI. We believe our

estimates are closer to where the buy-side investors are, as discussed in the above sections.

Exhibit 18: Our 2026/27 estimates are modestly below/above respectively, and our 2028 EPS estimate is 44% above Street

INTC GSe vs. Street (\$mn except per share data)	2026			2027			2028		
	GS	Street	% Diff.	GS	Street	% Diff.	GS	Street	% Diff.
Revenue	58,151	58,486	-0.6%	68,496	64,251	6.6%	81,486	71,728	13.6%
Gross Margin (%)	40.0%	40.2%	-26 bps	43.4%	42.5%	+88 bps	50.0%	46.4%	+360 bps
Operating Margin (%)	12.2%	12.4%	-19 bps	17.0%	15.8%	+119 bps	25.3%	20.8%	+452 bps

Price target methodology and key risks

Our 12-month price target of \$150 is based on 30x our normalized non-GAAP EPS (excl. SBC) estimate of \$5.00.

Exhibit 19: INTC 12-month Price Target

PRICE TARGET AND RISK/REWARD SUMMARY				
Method	Metric	Base	Bull	Bear
P/E Method	Normalized EPS Estimate	\$5.00	\$6.50	\$3.00
	Multiple	30.0x	35.0x	15.0x
	Valuation	\$150.00	\$228.00	\$45.00
	Calculated	\$150.00	\$227.50	\$45.00
	Upside/Downside	11.9%	70.1%	-66.4%
Price Target	12-Month Price Target	\$150.00	100% P/E	
	Potential Upside/Downside	11.9%		
	Dividend Yield at Current Price	0.0%		
	Potential Total Return	11.9%		

Source: Goldman Sachs Global Investment Research

Upside risks

Factors that could drive upside to our earnings estimates, price target and investment thesis include:

- 1) Better than expected traction for Intel foundry:** We believe that better than expected traction for Intel's foundry offerings at external customers would drive upside to our estimates.
- 2) Stronger than expected demand for server CPUs:** We believe stronger than expected proliferation of agentic AI, better attach rate for CPUs, and/or better than expected share for Intel in server CPU market could drive upside to our estimates.
- 3) Better than expected margin improvement:** A stronger than expected ramp in Intel's foundry could drive its gross margins closer to TSMC's margins, and present upside to our base case estimates.

Downside risks

Factors that could drive downside to our earnings estimates, price target and investment thesis include:

- 1) Slower than expected ramp of advanced foundry nodes:** We believe slower than anticipated ramp of Intel's advanced foundry nodes would be a headwind to revenues and gross margins, and would also negatively impact Intel's competitive standing in server CPU market – driving downside to our base case estimates.
- 2) Greater than expected share loss in server CPUs:** Slower than anticipated product launches from Intel, better than expected execution at competitors, or stronger traction for ARM architecture based CPUs could drive downside to our estimates.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Disclosures

Company-specific regulatory disclosures

The following disclosures relate to relationships between The Goldman Sachs Group, Inc. (with its affiliates, "Goldman Sachs") and companies covered by Goldman Sachs Global Investment Research and referred to in this research.

Goldman Sachs has received compensation for investment banking services in the past 12 months: Intel Corp. (\$131.65)

Goldman Sachs expects to receive or intends to seek compensation for investment banking services in the next 3 months: Intel Corp. (\$131.65)

Goldman Sachs has received compensation for non-investment banking services during the past 12 months: Intel Corp. (\$131.65)

Goldman Sachs had an investment banking services client relationship during the past 12 months with: Intel Corp. (\$131.65)

Goldman Sachs had a non-investment banking securities-related services client relationship during the past 12 months with: Intel Corp. (\$131.65)

Goldman Sachs had a non-securities services client relationship during the past 12 months with: Intel Corp. (\$131.65)

Goldman Sachs makes a market in the securities or derivatives thereof: Intel Corp. (\$131.65)

Distribution of ratings/investment banking relationships

Goldman Sachs Investment Research global Equity coverage universe

	Rating Distribution			Investment Banking Relationships		
	Buy	Hold	Sell	Buy	Hold	Sell
Global	50%	34%	16%	65%	60%	45%

As of April 1, 2026, Goldman Sachs Global Investment Research had investment ratings on 3,074 equity securities. Goldman Sachs assigns stocks as Buys and Sells on various regional Investment Lists; stocks not so assigned are deemed Neutral. Such assignments equate to Buy, Hold and Sell for the purposes of the above disclosure required by the FINRA Rules. See 'Ratings, Coverage universe and related definitions' below. The Investment Banking Relationships chart reflects the percentage of subject companies within each rating category for whom Goldman Sachs has provided investment banking services within the previous twelve months.

Price target and rating history chart(s)

The price targets shown should be considered in the context of all prior published Goldman Sachs research, which may or may not have included price targets, as well as developments relating to the company, its industry and financial markets.

Target price history table(s)

Intel Corp. (INTC)

Regulatory disclosures

Disclosures required by United States laws and regulations

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; for equity securities, market making and/or specialist role. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with a subject company, public appearances and trading in securities covered by the analysts.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to

it, is intended only for “wholesale clients” within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of Global Investment Research of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client’s objectives, financial situation or needs. A client should, before acting on any such advice, consider the appropriateness of the advice having regard to the client’s own objectives, financial situation and needs. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are available from Goldman Sachs International on request.

European Union and United Kingdom: Disclosure information in relation to Article 6 (2) of the European Commission Delegated Regulation (EU) (2016/958) supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council (including as that Delegated Regulation is implemented into United Kingdom domestic law and regulation following the United Kingdom’s departure from the European Union and the European Economic Area) with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest is available at <https://www.gs.com/disclosures/europeanpolicy.html> which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

Japan: Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan Type II Financial Instruments Firms Association, and Investment Management Association of Japan. Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock’s total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region’s Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts’ investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs’ involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an

investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

Global product; distributing entities

Goldman Sachs Global Investment Research produces and distributes research products for clients of Goldman Sachs on a global basis. Analysts based in Goldman Sachs offices around the world produce research on industries and companies, and research on macroeconomics, currencies, commodities and portfolio strategy. This research is disseminated in Australia by Goldman Sachs Australia Pty Ltd (ABN 21 006 797 897); in Brazil by Goldman Sachs do Brasil Corretora de Títulos e Valores Mobiliários S.A.; Public Communication Channel Goldman Sachs Brazil: 0800 727 5764 and / or contatogoldmanbrasil@gs.com. Goldman Sachs International ("GSI"), authorised by the Prudential Regulation Authority ("PRA") and regulated by the Financial Conduct Authority ("FCA") and the PRA, has approved this research in connection with its distribution in the United Kingdom.

European Economic Area: Goldman Sachs Bank Europe SE ("GSBE") is a credit institution incorporated in Germany and, within the Single Supervisory Mechanism, subject to direct prudential supervision by the European Central Bank and in other respects supervised by German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, BaFin) and Deutsche Bundesbank and disseminates research within the European Economic Area.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research, unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.

Disclosure information is also available at <https://www.gs.com/research/hedge.html> or from Research Compliance, 200 West Street, New York, NY 10282.
