Daily Views on Tech Headlines | NVDA, INTC, Huawei, FMS

NVDA: Kyber rack for Rubin Ultra reportedly slips

View: According to SemiAnalysis, NVIDIA's Kyber NVL144 rack, meant for 2027's Rubin Ultra, will be delayed more than 12 months to 2028 on manufacturing problems with the copper "orthogonal" PCB midplane that carries the NVLink fabric (signal-integrity, power, and thermal challenges as layer counts rise). NVIDIA also reportedly killed the NVL72x2 stopgap after large customers balked, and the optics-based NVL576 may slip or ship in low volume, since a production-ready co-packaged-optics NVSwitch is not expected before the post-Rubin Feynman generation; 2026 Rubin parts on the existing Oberon rack are unaffected. Per press reports, Nvidia has denied SemiAnalysis's conclusions.

Various speculation around Rubin Ultra concerns/delays has seemingly been proliferating since GTC (packaging, die count, memory, and now backplane concerns). With the product not due till 2H'27, we would expect some flexibility as NVDA works through the design process, with arguably the challenge having more to do with: 1) the increased scrutiny around NVDA designs given the implications for technology direction and the supply chain and 2) the extended product roadmap NVDA is providing to investors we believe in part due to the increased scrutiny around NVDA's technology direction.

Net, while NVDA's progress with Rubin Ultra is certainly something that needs to be monitored (particularly given supply chain implications tied to technology timing and direction), we believe it's too early to be concerned around potential NVDA delays for products that aren't due for another 12 to 18 months. [Tom's Hardware](#)

INTC: More CPU price increases?

View: Tom's Hardware suggests that both Intel Xeon and Core Ultra parts saw list price increases at the start of the 3rd quarter. Given continued shortages of server CPUs in particular, we see room for Intel to lift pricing without affecting demand. The question rather is whether OEM PX is seeing changes that parallel list price increases or whether Intel is only shifting distribution/retail pricing (a much smaller portion of Intel's business). [Tom's Hardware](#)**Huawei, Chip Design:** Huawei's Tau Scaling Law V2 details a 3D "LogicFolding" path, extending to Ascend AI chips

View: Per TrendForce (citing Chinese media and Huawei's ChinaXiv paper), Huawei's updated Tau Scaling Law lays out, pre "Logic Folding," which stacks digital, analog, and memory circuits across vertical active tiers for a claimed +55% transistor density and -41% power at a fixed node, validated first on the Kirin 2026 (155 to 238 MTr/mm², ~53.5% gain) and slated to reach the Ascend 990 accelerator around 2030, enabled by low-temperature hybrid bonding.

(Continued on page 2)

Wedbush Securities does and seeks to do business with companies covered in its research reports. Thus, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. Please see pages 3–7 of this report for analyst certification and important disclosure information.

As we noted previously, Huawei is not the first company to explore minimizing copper transmission distance to improve transistor performance. And while Huawei's packaging technique to achieve this goal is unique, we still believe it is unlikely to resolve the semiconductor manufacturing gap created by China's lack of access to EUV tools. [TrendForce](#)

FMS: August 4th-6th in Santa Clara

View: The Future of Memory and Storage Conference (formerly the Flash Memory Summit) takes place in Santa Clara from August 4th to 6th. We will be hosting in person investor meetings (centered around FMS and at company HQs close to the conference). Confirmed participants so far include: Micron; SanDisk, Silicon Motion; Toshiba HDD; Seagate, and Phison. Please reach out to us or your Wedbush sales representative if you'd like to participate.

Risks to the Attainment of Our Price Targets and Ratings: Hardware

- Shifts in competition, pricing, technology, and macroeconomic conditions.
- Changes in hyperscale spending tied to shifts in growth or increased optimization.
- Unforeseen events affecting production capacity (power outages, fires, storms, etc.).
- Shifts in worldwide trade conditions that lead to macro instability and or close certain markets.
- Increased competition from China based manufacturers entering new markets.

Wedbush Best Ideas List

The Wedbush Equity Research Department is focused on delivering alpha within the Life Sciences and TMT verticals. The Best Ideas List comprises our highest rated equities, chosen by our analysts, and vetted by our Investment Committee. To manage risk and avoid thesis creep, we employ an automatic sale rule should a stock move -25% on a relative basis (versus the average move of the S&P 500 and the Russell 2000).

Past performance is not an indicator of future results. Actual performance may differ from the performance information contained herein. The prices and performance information are based on data from statistical services, reports, or other sources which WS believes are reliable, but its accuracy cannot be guaranteed. Results presented in this report neither reflect inclusion of dividends nor deductions for commissions, costs, fees, or expenses. Such commissions, costs, fees, or expenses will reduce the actual returns. The volatility of the S&P 500 and/or any other benchmark index presented is materially different from that of the model portfolio and is used to illustrate the general market condition on the results portrayed. Benchmark Indices are unmanaged and cannot be invested in directly.

Analyst Certification

We, Matt Bryson and Antoine Legault, certify that the views expressed in this report accurately reflect our personal opinions and that we have not and will not, directly or indirectly, receive compensation or other payments in connection with our specific recommendations or views contained in this report.

Mentioned Companies

Company	Rating	Price	Target
Intel Corp	NEUTRAL	\$122.20	\$60.00
Nvidia	OUTPERFORM	\$195.55	\$330.00
Micron Technology Inc	OUTPERFORM	\$984.75	\$1,400.00
Seagate Technology Holdings PLC	OUTPERFORM	\$868.26	\$825.00
Sandisk Corporation	OUTPERFORM	\$1,744.43	\$1,200.00

Investment Rating System:

OUTPERFORM: Expect the total return of the stock to outperform relative to the median total return of the analyst's (or the analyst's team) coverage universe over the next 6-12 months.

NEUTRAL: Expect the total return of the stock to perform in-line with the median total return of the analyst's (or the analyst's team) coverage universe over the next 6-12 months.

UNDERPERFORM: Expect the total return of the stock to underperform relative to the median total return of the analyst's (or the analyst's team) coverage universe of the next 6-12 months.

The Investment Ratings are based on the expected performance of a stock (based on anticipated total return to price target) relative to the other stocks in the analyst's coverage universe (or the analyst's team coverage).*

Rating distribution (as of July 7, 2026)	Investment Banking Relationships (as of July 7, 2026)
OUTPERFORM: 76.10%	OUTPERFORM: 13.61%
NEUTRAL: 21.91%	NEUTRAL: 9.09%
UNDERPERFORM: 1.99%	UNDERPERFORM: 0.00%

The Distribution of Ratings is required by FINRA rules; however, WS' stock ratings of Outperform, Neutral, and Underperform most closely conform to Buy, Hold, and Sell, respectively. Please note, however, the definitions are not the same as WS' stock ratings are on a relative basis.

The analysts responsible for preparing research reports do not receive compensation based on specific investment banking activity. The analysts receive compensation that is based upon various factors including WS' total revenues, a portion of which are generated by WS' investment banking activities.

Company Specific Disclosures
